
Brian Butler –Biography 2012

Presentation: **Canine colorectal polyps and progression to malignancy; A retrospective study of 100 canine colorectal epithelial polypoid tumors.**

Brian Butler, DVM, MPH, PhD

Dr. Butler is an associate professor in the Department of Pathobiology at St. George's University. After graduating from SGU in 2005, Dr. Butler entered small animal practice for two years and then completed a PhD in comparative pathology at UC-Davis, followed by a pathology residency at Cornell. He is currently teaching pathology in the DVM curriculum at SGU and serving as a mentor to graduate students. In addition to teaching, Dr. Butler is the director of the diagnostic pathology service and participates in collaborative research. Dr. Butler is originally from Missouri and enjoys fishing and travelling in his spare time.
