

Dahai Shao Biography 2014

Dahai Shao is a Postdoctoral Research Associate in the Department of Veterinary Diagnostic and Production Animal Medicine at the Iowa State University. He received his Ph.D. in chemistry from Iowa State University in 2013.

Shao's research interests have spanned a wide range of topics, from method development of trace ion analysis, characterization of metal thin film, to analysis of biological macromolecules. His current research efforts focus on development and inter-lab validation of an analytical method for determination of aflatoxin M1 and B1 in liver. He has been awarded Iowa State University Teaching Excellence Award in 2012.
