3 Player Jumbo Deluxe Wall Mount Cribbage Board, 27 3/4" x 8 1/2", Metal Pegs, Laser Engraved, Wooden, Games, Paul Szewc

This is a fun, "giant" version of the cribbage board, created by Wood Artist Paul Szewc of Guelph, Ontario, Canada. It is a very comfortable and pleasing board to play the game on, and it has been crafted ready to hang on your wall for storage. When not using the board it can become a fun piece of artwork.

The board is made with a block of solid North American Hard Sugar Maple with the card/peg cover available. The peg holes were drilled with holes further apart to grip the pegs easier; numbers were enlarged for easier reading; the scoreboard was laser engraved—an upgrade from the screen-printed boards normally seen. The laser engraving will not wear off. The "wonky" design of the board and the custom laser-engraved skunk and double skunk images add his own flare. The wonky design is like his mini wonky jewelry boxes—whimsical.

This board can be played with 2 players, 3 players or 4 players (partners). It is finished with multiple sandings and sprayed with sealer then sanded again and then sealed. This creates that smooth-to-the-touch finish. This process is the same as what a high quality piece of furniture receives. It is very durable and requires no care. Simply wipe with a damp cloth if it becomes dirty. It comes with a deck of top-quality Bicycle playing cards, product tag and over-sized scoring metal pegs. The top of the storage box is held in place by rare earth magnets.
