This mini-symposium aims to share and discuss information on emerging trends, disruptive technologies, and practical innovations in key aspects of veterinary laboratory diagnostic science. A series of five presentations will be made and there will be ample time for Q&A and discussions.

Topics of Discussion:

- Combining Diagnostic Laboratory with Structured Data and Artificial Intelligence to enable better medicine by *Jon Lustgarten*

- Diagnostic Pathology in the Age of Genomics by *Barbara Davis*.

- Diagnostic bacteriology service delivery in the era of antimicrobial resistance crisis: Re-defining the veterinary approach by *Musangu Ngeleka*.

- Harnessing antimicrobial resistance data from diagnostic laboratory LIMS to the benefit of animal and human health by *Susan Sanchez*.

- Real-time integration of MALDI-TOF and BIOMIC data into an electronic bacteriology workflow by *Dan Andrews*.
